                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              the presence of hydroxy, mercapto or amino benzoate(s) and as regulating the transcription of associated gene(s). It shows 73% identity in the DNA binding domain, and 42% identity in the ligand binding domain, to the human vitamin D receptor. Recombinant XOR-6 can be expressed in animal cells; a cDNA clone (AAT36499) coding for XOR-6 has been isolated. The recombinant XOR-6 may be used to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          steroid receptor superfamily, characterised as being responsive to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Claim 4; Page 27-28; 42pp; English.

The present sequence represents rat VDR0. VDR1 differs from the canonical form of VDR (VDR0) by lacking the anino acid sequence encoded by exon 9, but instead substitutes a short sequence (GIEPGREELRUCHVCDCE in the rat protein) encoded by the 5 end of intron 8. VDR1 has a dominant negative effect on the vitamin D signalling pathway. The isotorm protein can be used for determining bone density,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Gene for vitamin D receptor isoform protein which blocks vitamin D signal pathway - and production of recombinant isoform protein using it, for bone density assay and for screening compounds for vitamin D
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      and for the screening of compounds (e.g. steroids and retinoic acid derivatives) for vitamin D activity (e.g. as bone calcium regulators
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Rattus sp
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Sequence

The isoform differs from the normal receptor (VDRO), which comprises the present sequence, in having the vitamin D response element currialled by 86 residues, and having an extra 19 residues inserted at the C terminal of this element.
